

Asset Management

Warehousing/Warehouse Management

- 150,000 square foot capacity warehouse in Lake County, IL.
- Storage capacity for excess furniture, documents or excess inventory.
- Snaptracker software and bar-coding technology allowing instant updating of inventory when changes occur.
- Internet access to inventory for inquiry, reservation and evaluation purposes. Digital imaging available.
- Reservation system allowing multiple users to reserve product in advance for future projects.
- Single centralized location for inventory with the capability to receive and send furniture throughout the country utilizing Office Concepts and the FacilitiLink network.
- Workstation Standards that can be built utilizing existing inventoried components.
- Use Trial Kitting to determine how many standard workstations can be built with your inventory.
- Complete descriptions of furniture including manufacturer, model number, fabrics and finishes and current condition.
- We offer a stocking program. Our customers can determine minimum quantities for standard items and we can provide quotation as inventory runs low to ensure standard items are always in stock.
- Customer reporting fully automated to provide information needed to store only productive assets.
- Analysis of inventory by date received, origin, P.O. number, furniture class, length of time in the warehouse, most frequently used items, etc.
- Inventory reports can be e-mailed and read using .PDF file format or downloaded off the Internet.
- Digital images of assets in storage can be viewed on-line via the Internet or e-mailed using JPEG file format.

Asset Disposal/Relocation

- Can offer used furniture to furniture brokers or Revest Midwest when it comes time to dispose of existing furniture.
- Have list of many charities on file, which regularly take donation of old furniture.
- Can relocate and ship your furniture anywhere in the country through our network of dealers throughout the country.

Onsite Asset Management

- Onsite inventories for fixed asset record keeping, furniture reconfiguration or resale/brokering.
 - Complete descriptions of furniture including manufacturer, model number, fabrics and finishes and current condition.
 - Analysis of inventory by date purchased, location, department, P.O. number, furniture class, length of time in service, etc.
 - Designers can convert inventory to CapSif file for use in CAD drawings when doing reconfigurations.
-
