

Recycling Services

Reusing and refurbishing existing products, instead of throwing them out or recycling them, creates less air and water pollution and save money. Every day approximately 137,000 computers are thrown out and 80% of these electronics end up in a landfill. The improper disposal of electronics equipment is a major source of toxic chemicals in the environment. Know the facts. Know how to make a difference.

Recyclable Electronics Equipment

- Computers
- Computer Monitors
- Keyboards
- Mice
- Printers
- Televisions

Let Us Help Make Recycling Easier

Office Concepts is committed to doing its best to reduce, reuse and recycle. We also want to help our clients to do the same. That's why we help facilitate the proper disposal and brokering of your out-of-date, worn-out and broken office furniture and electronics equipment.

Brokering Furniture

Office Concepts helps our customers broker unwanted furniture. We conduct an initial review of product to be evaluated and obtain quotes to determine the value of the furniture. We work in conjunction with a national network of used furniture brokers to obtain the best value for used furniture.

Office Concepts coordinates, if necessary; various service providers to further evaluate the products to be reused for suitability, reparability and cost effectiveness. Then we present the options and costs to our customer.

Refurbishment

Office Concepts has a full service refurbishment program that can make old furniture look new again. We offer the following services:

- Furniture Touch-ups
- Repainting metal furniture
- Reupholstering of panels and seating
- Refinishing of all types of wood furniture
- Modification of existing furniture, including lowering of partition heights and work surface lengths and shapes

Reuse Program

Office Concepts can inventory, design, project manage and reconfigure any of your existing furniture assets. We work closely with you to determine the best overall design and objectives for the reuse of your furniture, so you can make the most of what you already have.

Electronics Recycling Service

Office Concepts offers pickup and recycling of all your unwanted electronic equipment. We can recycle your out-of-date computers, TVs and more. We make this as easy and hassle-free for our customer.
